

## Core Competencies

NMT's PMADS platform strengthens Department of War efforts with a powerful systems engineering solution. It builds a unified digital thread across the product lifecycle, seamlessly connecting stakeholder needs to Science & Technology, Test & Evaluation, Acquisition, and Sustainment functions.

## Competitive Differences

Unlike reporting-heavy software tools or subscription-based platforms, PMADS delivers a mature operational digital thread with intuitive role-based perspectives and one-time paid-up licensing — backed by NMT's 30+ years of DoW acquisition expertise.

## Comparable Experience

- Powered Army C-RAM urgent fielding during OIF/OEF by unifying stakeholder teams.
- Enabled ASE Program Manager to earn Army "PM of the Year" through faster portfolio decisions.
- Delivered 15+ years of operational excellence across PEO IEW&S, PEO C3T, PEO STRI, PEO Missile and Space, and Spc Missile Defense.
